

Introducing an exclusive relationship between the BC Chiropractic Association & the advanced diagnostics facility at False Creek Surgical Centre.

False Creek Surgical Centre is pleased to announce an exclusive relationship with The British Columbia Chiropractic Association.

False Creek Surgical Centre is Canada's premier ambulatory surgical and diagnostic facility where clinical excellence is matched by personalized service. Our state-of-the-art facility offers the following advanced diagnostics to BC Chiropractic Association ("BCCA") patients in a unique environment unlike anywhere else...

False Creek Surgical Centre has been pioneering change in Canada's healthcare system, helping thousands of practitioners assist their patients' in expediting care, taking control of their health and improving their wellbeing. Our mission is to provide excellence in healthcare while offering patients and practitioners rapid access to diagnostic and other clinical services.

Our exciting, exclusive relationship with the BC Chiropractic Association will afford practitioners and patients alike an environment that offers a patient centered approach to healthcare and provides the BCCA with the highest level of collaboration, interaction and assistance to provide patients with sustainable outcomes and a continuum of care.

*Contact our onsite Radiologist directly by phone to discuss patient outcomes.
Dr Yervant Arzumanian - 604 628-2822*

Dr Don Nixdorf, Executive Director BCCA

The BC Chiropractic Association welcomes the partnership with Advanced Diagnostics at False Creek to support the public and BC's chiropractic doctors with timely access for diagnostic support. Spine and related problems account for 1/3 of all necessary health care services making this partnership important for early diagnosis and treatment for improved patient outcomes and subsequent lower health costs to British Columbians.

Dr Mark Godley, Medical Director

We are very pleased with the opportunity to finalize a strategic partnership with the British Columbia Chiropractic Association. This unprecedented opportunity affords both patients and practitioners expedited access to the Advanced Diagnostics at the False Creek facility. This will support practitioner and patient in making informed decisions quickly. Our mutual patient centered approach to healthcare provides the BC's Chiropractors with the highest level of collaboration, interaction and assistance to provide patients with sustainable outcomes and excellence in care.

This exciting Partnership provides BCCA's patients with:

- immediate access to all diagnostics for patients
- patients scans are booked within 24 hours
- requisitions accepted by False Creek directly from Chiropractors that are BCCA members
- no GP referrals necessary
- all Radiology reports and CD of the scans will be sent directly to referring Chiropractors office
- Telephonic access to Radiologist available to Chiropractors to discuss patient outcomes

• **3.0T MRI**

Producing radiation free images that are the closest thing to blueprints of the human body, our state-of-the-art 3 Tesla MRI machine is the first available 3T magnet in Canada for clinical use and is the highest resolution scanner available in the world today. A high-performance, clinically proven scanner, Signa HDx 3.0T helps you definitively diagnose your most complex cases and further supercharges HD performance with lightning speed, superb image quality and unique premium clinical applications.

• **64 Slice CT**

The LightSpeed VCT is the latest innovation in CT technology. VCT means "Volume CT" ushering in a new era in CT imaging. The innovative hallmark of this non-invasive imaging system is the new V-Res detector with its ability to deliver wide anatomical coverage and high resolution, simultaneously. This unprecedented coverage speed allows clinicians to capture whole organs in a second, the heart in 5 beats or go head to toe in under 10 seconds – faster than any other CT scanner on the market today. Specifically, the LightSpeed VCT covers 4cm of patient anatomy per rotation, gathering 64 slices at 0.625mm (about the thickness of a credit card). Gantry rotation speed is < 375 milli-seconds...or approximately 2.5 to 3 rotations per second.

• **Digital X-Ray**

Our new GE dual-scan digital x-ray unit demonstrates outstanding sensitivity & resolution, and provides weight bearing images of the entire body.

• **Ultrasound**

Ultrasound is one of the most widely used diagnostic procedures available. It provides a safe, non-invasive and virtually painless means of observing soft tissue anatomy on an outpatient basis. Our Philips ultrasound system generates an advanced level of image quality to help you diagnose with confidence. It may provide you with all the information needed to recommend a course of action, eliminating the need for other types of more complicated exams or exploratory surgery.

List of Conditions:

- **Strains and sprains**
- **Dislocations**
- **Back Pain**
- **Work Place Injuries**
- **ICBC Claims**
- **Sporting Injuries**
- **Pelvic Pain**
- **Shoulder and Back pain**

Actual scanning resolution capabilities:
